

Narrowing the problem:

- vaping
- vaping at a certain time? → class, Zoom
→ bed
→ other house

Zoom class

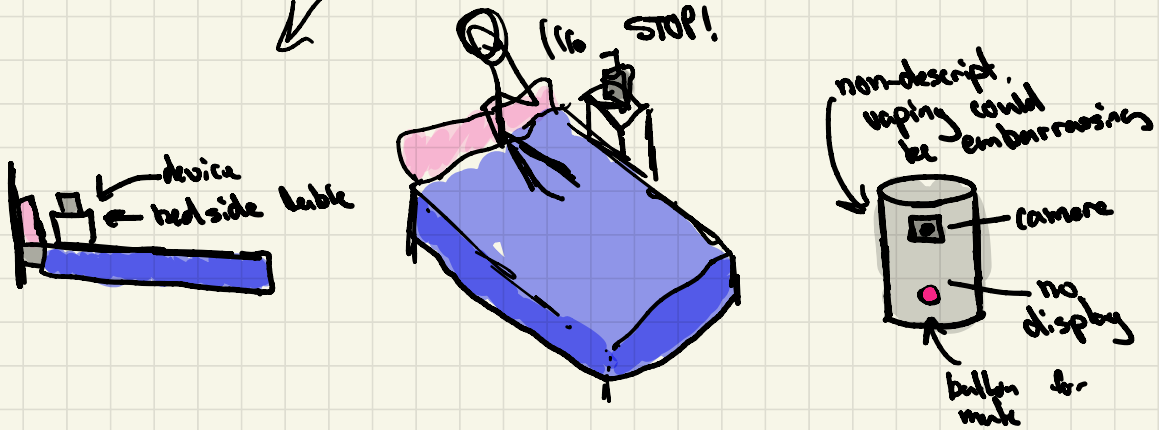

- eh, it happens and has big impact, but its like an 20% problem

bed

- frequent, and verifiable

other room

- maybe more common but difficult to try out

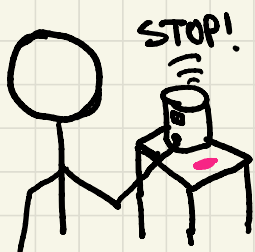

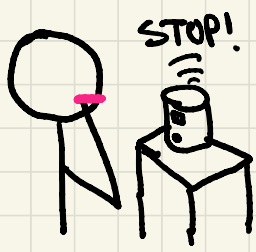

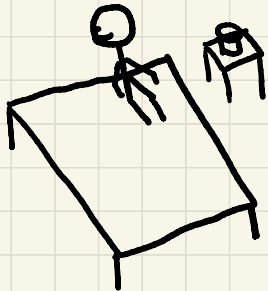

Future considerations:

- Volume buttons - should be ok for now, but would be good to add
- stats - display not super necessary but could be cool

Positioning:

- not necessarily a device to make you quit, but to cut down in inappropriate places.
